Digital Arts (DIA)

Digital technologies are reshaping all aspects of our culture; the arts and its related commercial and entertainment industries are no exception. The Digital Arts Minor enables students to explore digital production tools in print, Web, video, animation, game, CD, DVD, performance, installation, interactive experience, information visualization, and public space. In addition to production skills, the Digital Arts Minor builds critical literacy in reading and understanding images, sound, and information as well as in interacting in mediated social networks. It encourages creative thinking and problem solving, often cited as necessary skills for the 21st century and the pace of change in technology. The minor provides the education and fosters skills now crucial to being a citizen, consumer, cultural producer, and innovator in today's global visual and information culture.

This minor is particularly well suited for, but not limited to, students in Studio Art (ARS), Cinema and Cultural Studies (CCS), Computer Science (CSE), Engineering, Multidisciplinary Studies (MTD), Music (MUS), Theatre (THR), Journalism (JRN), and Business (BUS).

DIA

Digital Arts

DIA 383: Topics in Game Studies
The course critically examines video games within cultural, social, political, and historical contexts. It is designed to afford an immersive study of a range of topics pertinent to the scholarly study of video games. Possible topics include: game history, games art and design, game preservation, game play and experience, games and culture, racial and gendered subjectivities. This course is offered as both CCS 383 and DIA 383. May be repeated as the topic changes, to a maximum of 6 credits. Previously offered as CCS/DIA 396 and CCS/DIA 397. Not for credit in addition to CCS/DIA 396 and CCS/DIA 397.

Prerequisite: CCS 101 and U3 or U4 status

DEC: H
SBC: ESI, STAS
3 credits

DIA 444: Experiential Learning
This course is designed for students who engage in a substantial, structured experiential learning activity in conjunction with another class. Experiential learning occurs when knowledge acquired through formal learning and past experience are applied to a “real-world” setting or problem to create new knowledge through a process of reflection, critical analysis, feedback and synthesis. Beyond-the-classroom experiences that support experiential learning may include: service learning, mentored research, field work, or an internship.

Prerequisite: WRT 102 or equivalent; permission of the instructor and approval of the EXP+ contract (http://sb.cc.stonybrook.edu/bulletin/current/policiesandregulations/degree_requirements/EXPplus.php)
