Technology Management Prog

TMP 541: MANAGERIAL ECONOMICS
The techniques and approaches of microeconomic reasoning are applied to issues of managerial decision making in the corporation. The theory of the market and the price system are closely examined for the purpose of identifying those areas where neoclassical economics is helpful to the analyst and manager. Special attention is paid to cost-benefit analysis and models of economic behavior. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 542: International Business, Technology and the Economy
International trade and investment in technology-intensive fields is examined from the perspective of economic theory. Theories of foreign direct investment and international competitive advantage will be examined in the context of the changing global economy. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 545: Basic Financial Accounting
Introduction to financial accounting which includes the accounting cycle, analysis and preparation of financial statements, cash flow analysis, corporate accounting, investment in stocks, and international transactions. Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 546: Managerial Accounting for High Technology Organizations
Development and presentation of accounting information for managerial decision making in a global technological environment. Topics include budgeting, forecasting, profit analysis and planning, performance evaluation, transfer pricing, capital budgeting, performance measurement, and cost control. Special emphasis will be given to accounting issues pertinent to high technology companies, such as valuation of intangible assets. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 547: Industry Project
The class provides students with the opportunity to apply the analytic skills they have learned in the classroom to actual management problems. The class will visit various American businesses to learn about the operation, marketing, and financing of the business. Students will be divided into working groups and each group will examine problems in the businesses based on discussions with the managers of various companies visited. Students will recommend solutions to the problems presented by the management. Each group will write a report and make a presentation of their project. Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 548: Ethics, Corporate Governance and Control Systems
This course explores the values that govern corporate behavior. Topics include understanding ethical behavior, corporate ethics programs, employee responsibilities, and codes of conducts and governance. Sarbanes-Oxley (SOX) is examined as a watershed legislation that has implications for U.S. companies and non-U.S.-based, multinational companies doing business in the U.S. Examples of similar legislation in the EU and elsewhere are covered. Related topics are corporate social responsibility (CSR) (with cases and examples from U.S. and abroad), ways to promote employee engagement, human resource management risk assessment, and human resource information systems. The course also covers mechanisms for developed a positive organizations culture and engaged workforce. This includes review of employee relations programs, developing and learning a high performing team, and developing a continuous learning organizational culture. Case discussions and exercises (e.g., developing a code of conduct) provide hands-on learning experiences. Spring, 1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 549: Negotiation Strategy
This course is designed to equip students with the basic theories and skills of negotiation. Accordingly, it consists of several parts. The first part is the introduction to the newly developed approaches to negotiation; how you can improve your negotiation skills and outcomes. Also some commonly encountered negotiation tactics will be introduced, not to make you victims of those tactics. The second is simulation; students will engage in several negotiation simulations with other students under specific negotiation mandates and the outcomes will be reviewed. The last is a brief introduction to the game theory with an emphasis on the cooperative games; this part deals with the theoretical foundations of bargaining and dispute resolution. Knowledge from economics and mathematics will be helpful but not required. Offered in Spring, 1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 551: Data Analysis for Technology Managers
The use and limitations of mathematical and statistical techniques, especially for the use of data in choosing between alternative strategies for companies. Probability, estimation, hypothesis testing, analysis of variance, and regression analysis are among the topics covered. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 552: Management Science for Technology Managers
An introduction to the use of modeling in management, particularly in high technology contexts. Basic concepts of management science are covered and a variety of models are examined for application in quantitative decision making. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 555: Technology, Government and Business
Examines the role of government as a regulator of technological business activity, a customer for technological products and services, a source of funding for technological development, and a facilitator of technological innovation. Special topics include technology assessment, technology transfer, and frameworks for national and regional technology policy. Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 573: Basic Marketing Principles and the Information Economy
Introduction to the basic principles of marketing, including: the influence of the marketplace and the marketing environment on marketing decision making; the determination of a firm's product prices, channels, and communication strategies; and the firm's system for planning and controlling its marketing effort. Special emphasis will be given to marketing in information industries and knowledge-intensive industries. Prerequisites: TMP 552
Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

TMP 574: Marketing of Technology Based Products
Adaptation and extension of basic marketing concepts for technological products. Topics include: understanding unarticulated user needs, demand forecasting and strategic planning in technology markets, product design and architecture, product platform strategy, managing new product realization
programs, and managing the technology adoption lifecycle. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 575: Introduction to Management Information Systems**
The analysis and design of information systems to aid in managerial decision making and the effective operation of corporations. Pertinent computing, telecommunication and systems technologies will be surveyed. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 576: Management Information Systems for Accounting, Budgeting and Human Resources Management**
Examination of recent MIS options for specialized functions in an organization, such as accounting, budgeting and human resources. Includes review and assessment of integrated multi-function software suites for organizational management, and comparison of packaged software systems versus web-based subscription software services. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 577: Competitiveness Project (A): Models and Concepts**
First part of course-pair TMP577 & TMP578. Students choose a project that focuses on technology management issues in their own industry or organization and apply tools learnt in other courses to analyze the issues. Part A of this pair of courses concentrates on problem formulation and the planning of research and analysis. This course is intended to commence mid-way through the program and be taken concurrently with the next several courses in the program.
Prerequisites: TMP 552
Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 578: Competitiveness Project (B): Quantitative Methods**
Second part of course-pair TMP577 & TMP578. Students take the issues formulated during Part A of this pair of courses and proceed to implement the research plan also developed in that course. Part B of this pair of courses involves detailed data collection, analysis, and reporting of results. This course is intended to commence three-quarters of the way through the program and to be taken concurrently with the next several courses. Submission of the project report and a formal presentation of results are required near the end of the program. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 585: Operations Management for Technology Organizations**
Introduction to the analysis and measurement of processes for creating and delivering goods and services. Covers trade-offs in operations management decisions, product and process planning, layout and location strategy, production scheduling, inventory control, quality management, computer integrated manufacturing, and cost justification, especially in the adoption of new technologies. Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 586: Human Resources Management for High Technology Environments**
Survey of issues in personnel recruitment, employee selection and classification, workforce evaluation, wages, benefits, regulations, unionization, training, quality management, and employee performance in high technology settings. Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 591: Technology Management and Emerging Industries**
First part of course-pair TMP591 & TMP592. Introduction to salient issues facing managers of enterprises involved in the development and implementation of new technologies. Usual will be made of case histories and presentations b~ technological managers and innovators, wherever possible. Part A of this pair of courses will concentrate on the relationship between technological innovation and emerging industries. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 592: Role of Technology Standards**
Second part of course-pair TMP591 & TMP592. Introduction to salient issues facing managers of enterprises involved in the development and implementation of new technologies. Use will be made of case histories and presentations by technological managers and innovators, wherever possible. Part B of this pair of courses will concentrate on the role of technical standards in the dynamics of competition between firms in high technology industries. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 593: Developing Technology Management Solutions (A)**
First part of course-pair TMP593 & TMP595. Special course customized each year to address current trends and solutions to management problems in technological enterprises. Examples would include trends in electronic commerce, new approaches to product development strategy for technology, information security and privacy, or trends in the biotechnology industry. The course will involve field to companies and guest lectures by executives from technology companies wherever possible. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 594: Financial Management**
Business concepts, practices and procedures to analyze financial flows, especially in high technology settings. Topics covered include the basic mathematics of finance, capital budgeting, capital structure, dividend policy, mergers, and working capital management.
Prerequisites: TMP 552, TMP 546
Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 595: Developing Technology Management Solutions (B)**
Second part of course-pair TMP593 & TMP595. Special course customized each year to address current trends and solutions to management problems in technological enterprises. Examples would include trends in electronic commerce, new approaches to product development strategy for technology, information security and privacy, or trends in the biotechnology industry. The course will involve field to companies and guest lectures by executives from technology companies wherever possible. Summer
1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 596: Financial Markets and Venture Finance**
Covers the variety of means by which corporations, especially high technology firms, may be financed. Topics include capital markets, investment principles, venture finance, and a continuation of the mathematics of finance covered by TMP 594.
Prerequisite: TMP 594
Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)

**TMP 597: Technology Management and Strategy**
First part of a course-triad TMP597, TMP598 & TMP578. Concepts and techniques of strategic management are examined and applied to relevant cases involving technology management. The class synthesizes all elements of the program and examines how an organization can plan and develop initiatives, evaluate their effectiveness, and manage the
change process. Part A emphasizes corporate strategy.

*Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)*

**TMP 598: Technology and Entrepreneurship**

Second part of a course-triad TMP597, TMP598 & TMP578. Concepts and techniques of strategic management are examined and applied to relevant cases involving technology management. The class synthesizes all elements of the program and examines how an organization can plan and develop initiatives, evaluate their effectiveness, and manage the change process. Part B emphasizes entrepreneurial strategy.

*Summer, 1.5 credits, Letter graded (A, A-, B+, etc.)*

**TMP 599: Intellectual Property Strategy**

Third part of a course-triad TMP597, TMP598 & TMP578. Concepts and techniques of intellectual property strategy are examined and applied to relevant cases involving technology management. The class synthesizes all elements of the program and examines how an organization can plan and develop initiatives, evaluate their effectiveness, and manage the change process.

*1.5 credits, Letter graded (A, A-, B+, etc.)*
